

**Focus on *COVID19***

## A complete line for nCOV19:

With the aim to fix the emergency screening, it is important to have a quick and immediately usable answer about suspected infection, allocation of hospital resources and follow-up. Immunospark provides a solution for rapid Immunological screening applicable to field and clinical locations, in order to provide a preliminary diagnostic information in a few minutes to be confirmed by other systems based on immunological or molecular technology. The tests are run on different types of sample (whole blood, plasma or serum).

### Quickspark Rapid nCOV19 test

#### **RTVI039**      **Rapid nCOV19 IgG/IgM Combo**

- *Differential result in 15 minutes*
- *Only a finger-pricked sample*
- *No need of reading equipment*
- *Compatible with lab application*
- *Ideal for drive-through solutions*
- *3 format available (10, 25 and 50 tests)*

## PRISMA nCOV19 ELISA assays

**ELVI021G**     *PRISMA Anti-nCoV IgG ELISA kit*  
**ELVI021M**     *PRISMA Anti-nCoV IgM ELISA kit*  
**ELVI021A**     *PRISMA Anti-nCoV IgA ELISA kit*  
**ELVI021AG**    *PRISMA SARS2-nCoV NP ELISA kit*

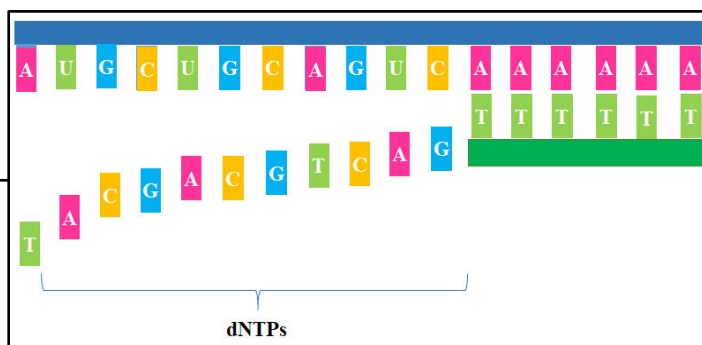

- Applicable on open automatic ELISA processors
- Ideal for big routine laboratories

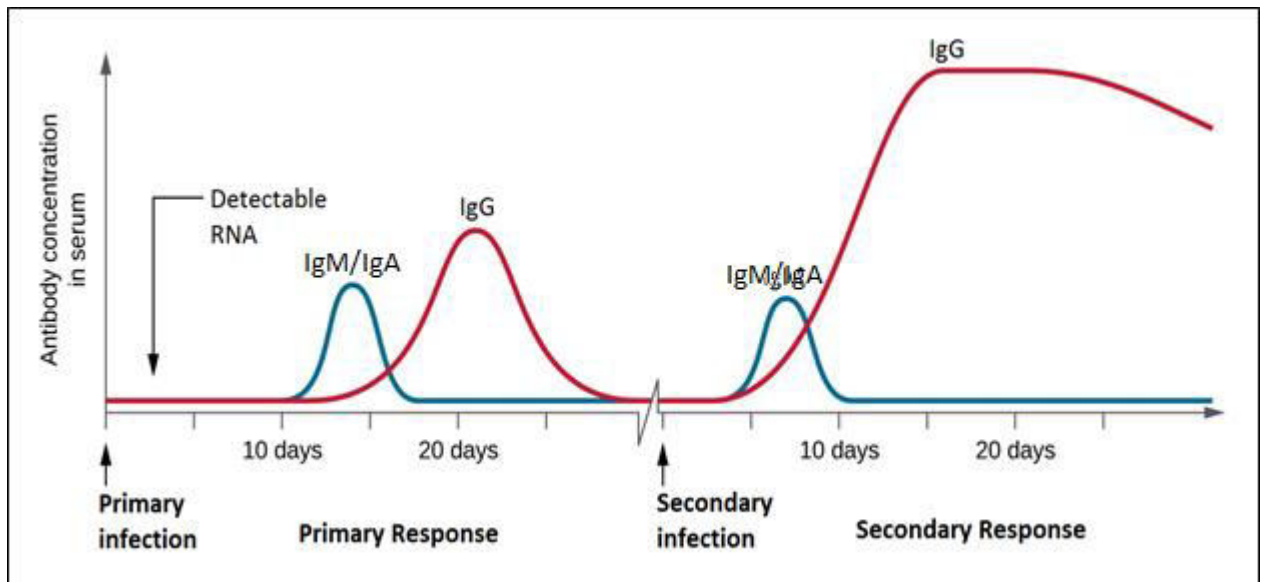

## Genespark Realtime PCR **molecular** assays

**HV034**             *Realtime-PCR SARS-CoV2 genome detection assay*  
**EXMB003-50**     *Integra magnetic particles RNA/DNA extraction kit*  
**EXMB003-200**   *Integra magnetic particles RNA/DNA extraction kit*

- Applicable on open platform
- Compatible with completely automated systems
- Applied on the Immunospark automatic solutions (Enquire!!)
- Sensible and specific
